

Spectro-ellipsometer WVASE 32 Woollam

Technical details:

Spectro-ellipsometer

VASE Woollam for reflexion and transmission ellipsometry measurements

- a. reflexion and transmission ellipsometry
- b. generalization ellipsometry (anisotropi and birefringence)
- c. reflectance and transmittance .
- d. scaterometry
- e. depolarization

Characteristics :

Spectral range : 193 up to 2200nm

6.4 down to 0.56eV

Automatic set-up between 15 si 90O of the incidence angle

Automatic set-up of the wave-length made by the monochromator

Autoretarder for high accuracy measurements
